

PCS00411 Scotland SCI-DC consent

EMIS is pleased to announce the following changes, which enable you to record and manage patient consent to sending details to the Scottish Care Information Diabetes Collaboration (SCI-DC) Network, the shared electronic record for diabetes.

- In Registration, a new field has been added for SCI-DC Consent:

| | | | |
|----------------|---------------------------|--------------------------|---------------------------|
| Upload Consent | | ECS (GP Summary) Consent | |
| eAMS Consent | Yes | Patient Consent | Implied Consent (default) |
| SCI-DC Consent | Implied Consent (default) | | |

SCI-DC Consent field in Registration, circled in red

Implied Consent is the default setting for new and existing patients. If necessary, you can edit this to indicate that a patient does *not* consent to their details being sent to SCI-DC (see below).

Details of patients who meet the following criteria will be extracted and sent to SDI-DC:

- Implied consent.
- Valid Community Health Index (CHI) number.
- One of the required diabetes clinical terms (Read codes) in the medical record.
- In Searches and Reports, SDI-DC Consent has been added as a new search feature (in Registration search criteria). You can create a search for patients with Implied Consent or Consent Withdrawn.

For more information about using SCI-DC with EMIS PCS, refer to Import Lab Test in EMIS PCS Help, and/or the following documents, available from the common room area of the EMIS website (www.emis-online.com):

- TH372 PCS Scotland Viewing imported reports
- TH384 PCS Scotland Managing imported reports
- TH475 PCS Scotland SCI DC back population

For more information about SCI-DC, go to:

- <http://training.diabetes.scot.nhs.uk/Implementation/Homepage/SCIDCEExternalImplementationHomePage.htm>

Withdraw SCI-DC consent

1. From the main menu, click **Registration** in the Administration and Documents section, or type **RD**.

Note: If you do not have a patient selected, you are prompted to choose one.

2. Select the required patient.

The Registration Details screen is displayed.

3. Click **Edit Patient** and select **Edit Registration**.

4. Click beside the SDI-DC Consent field and select **Consent Withdrawn (at patient request)**.

5. Click **File** or press **F8**.

The patient's consent is amended and no information for that patient is sent to SCI-DC.
